• Update:

Over night, a large cloud cluster developed to the west of Diego Garcia. The bulk of this activity will remain west of Diego Garcia, but may extend/propagate east during the first half of the day. No change to the forecast.

Forecast schematics zoomed into the DYNAMO array are in slides 2 and 3. Recent satellite observations from over the array follow.
Day 4: 0Z  11-Nov to 12-Nov

Day 5: 0Z  12-Nov to 13-Nov
