• Update:

Based on ASCAT winds, near-equatorial westerlies encompass most of the longitudes of the Indian Ocean.

Northern array convection much less active than the past few nights. Southern band has either become unrecognizable or it has merged with the broad northern band.

No change to forecast. Forecast schematics zoomed into the DYNAMO arrays are in slide 2.
Yesterday’s Summary: 0Z
21-Nov to 22-Nov

Day 1: 0Z
22-Nov to 23-Nov

Day 2: 0Z
23-Nov to 24-Nov

Day 3: 0Z
24-Nov to 25-Nov

Day 4: 0Z
25-Nov to 26-Nov

Day 5: 0Z
26-Nov to 27-Nov
