

NASA B200/MILAGRO-5 Flight Summary

7 March 2006

Goals

- Raster pattern over Mexico City and area south of MC basin to where outflow was predicted
- Overflight of stacked patterns from G1 flight plan "P"

Intended Flight Plan

Flight Operations

Take off: 1700 UT

Landing: 2048UT

Mission proceeded as planned and data were acquired corresponding to all objectives.

Lidar data images from this flight will soon be posted to the Research Products section of the MILAGRO Field Catalog.

Instrument Status

The HSRL and HySPAR instruments functioned nominally. The LAABS instrument locked up a few times during the flight and had to be restarted.
